

# KS2 Problem Solving Questions

Thursday 30<sup>th</sup> March 2017

1 Alex has a bag of sweets.

He eats the **same** number of sweets each day.

After 2 days he has  $\frac{5}{6}$  of the sweets left.

After another 4 days he has 15 left.

How many sweets are in the bag?

2 Mr Dexter buys the following.

The TV costs £130 more than the bike.

The total cost is £420

How much does the TV cost?
