

Day 14

The shape is divided into 20 identical squares.

How many more squares do I need to shade so that 75% of the shape is shaded?

11

15

At a football tournament there are 13 different teams.
Each team has 11 players.

Which calculation does NOT show how many players are a part of the tournament altogether?

$130 + 13$

$110 + 11 + 11 + 11$

$(10 \times 11) + 33$

$130 + 11$
